Contents of Volume 70

No. 1

K.C. Horner, W. Huang and J.P. Erre *(France)*
The effect of a taurine modified diet on normal and hydropic ears of the guinea pig 1

E.A. Mroz, K.R. Nissim and C. Lechene *(USA)*
Electron-probe analysis of isolated goldfish hair cells: Implications for preparing healthy cells 9

E.A. Mroz, K.R. Nissim and C. Lechene *(USA)*
Rapid resting ion fluxes in goldfish hair cells are balanced by (Na^+,K^+)-ATPase 22

H.S. Haggerty, H.S. Lusted and S.C. Morton *(USA)*
Statistical quantification of 24-hour and monthly variabilities of spontaneous otoacoustic emission frequency in humans 31

B.D. Mensh, M.C. Patterson, M.L. Whitehead, B.L. Lonsbury-Martin and G.K. Martin *(USA)*
Distortion-product emissions in rabbit: I. Altered susceptibility to repeated pure-tone exposures 50

B.D. Mensh, B.L. Lonsbury-Martin and G.K. Martin *(USA)*
Distortion-product emissions in rabbit: II. Prediction of chronic-noise effects by brief pure-tone exposures 65

N.B. Slepecky and M. Ulfendahl *(USA, Sweden)*
Evidence for calcium-binding proteins and calcium-dependent regulatory proteins in sensory cells of the organ of Corti 73

E.C. Oesterle, T.T. Tsue, T.A. Reh and E.W. Rubel *(USA)*
Hair-cell regeneration in organ cultures of the postnatal chicken inner ear 85

P. Avan, P. Bonfils, D. Loth and H.P. Wit *(France, the Netherlands)*
Temporal patterns of transient-evoked otoacoustic emissions in normal and impaired cochleae 109

S. Xue, D.C. Mountain and A.E. Hubbard *(USA)*
Acoustic enhancement of electrically-evoked otoacoustic emissions reflects basilar membrane tuning: Experiment results 121

D.G. Campbell, H.J. Daniel III and W.G. Hume *(USA)*
Aging and otitis media as sources of variance in the rat auditory brainstem response 127

No. 2

Regular Papers

W.F. Sewell and E.A. Mroz *(USA)*
Flavin adenine dinucleotide is a major endogenous fluorophore in the inner ear 131

E.A. Mroz and C. Lechene *(USA)*
Calcium and magnesium transport by isolated goldfish hair cells 139

E.A. Mroz and C. Lechene *(USA)*
Extracellular *N*-methyl-D-glucamine leads to loss of hair-cell sodium, potassium, and chloride 146

D. Durham, F.M. Matschinsky and E.W. Rubel *(USA)*
Altered malate dehydrogenase activity in nucleus magnocellularis of the chicken following cochlea removal 151

A.M. Brown *(UK)*
Distortion in the cochlea: Acoustic f_2-f_1 at low stimulus levels 160

J.N. Brown, J.M. Miller, R.A. Altschuler and A.L. Nuttall *(USA)*
Osmotic pump implant for chronic infusion of drugs into the inner ear 167

D.E. Vetter, E. Saldaña and E. Mugnaini *(USA, Spain)*
Input from the inferior colliculus to medial olivocochlear neurons in the rat: A double label study with PHA-L and cholera toxin 173

P.A. Pollice and W.E. Brownell *(USA)*
Characterization of the outer hair cell's lateral wall membranes 187

S. Komune, T. Nakagawa, K. Hisashi, T. Kimitsuki and T. Uemura *(Japan)*
Mechanism of lack of development of negative endocochlear potential in guinea pigs with hair cell loss 197

S.-A. Xu, R.K. Shepherd, Y. Chen and G.M. Clark *(Australia)*
Profound hearing loss in the cat following the single co-administration of kanamycin and ethacrynic acid 205

M.B. Carey and R. Zelick *(USA)*
The effect of sound level, temperature and dehydration on the brainstem auditory evoked potential in anuran amphibians 216

M. Von Unge, W.F. Decraemer, D. Bagger-Sjöbäck and J.J. Dirckx *(Sweden, Belgium)*
Displacement of the gerbil tympanic membrane under static pressure variations measured with a real-time differential moire interferometer 229

D.R. Schwartz, J. Schacht, J.M. Miller, K. Frey and R.A. Altschuler *(USA)*
Chronic electrical stimulation reverses deafness-related depression of electrically evoked 2-deoxyglucose activity in the guinea pig inferior colliculus 243
